- Dimmable LED driver with RF control
- Max. output power 75W total
- 4 channels constant current output
- $300 \mathrm{~mA}-1500 \mathrm{~mA}$ output current optional
- Dips to set the operation current

Class II power supply full isolated plastic

- High power factor and efficiency
- To control single color, dual color, RGB/RGBW LED lighting
- Compatible with a variety of RF remotes
- IP20 rating
- Suitable for indoor LED lighting applications
- Radio Frequency : 868/869.5/916.5/434mhz
- 5 years warranty

## Safety \& Warnings

- DO NOT install with power applied to device.
- DO NOT set the operation current with power applied
- DO NOT expose the device to moisture.

Note: When paired to a single color RF remote and 4 PWM output channels are wired to LED loads simultaneously, please make sure the operation current of the LED loads does not exceed 1100 mA .

## Pair/delete the pairing with RF remote

1. Do wiring according to connection diagram.
2.Pair RF Receiver with RF remote: please refer to the instruction of the remote that you would like to pair with.
3.Delete the pairing:
(1)Wire up the RF receiver correctly, power on.
(2)Press and hold down the "Learning Key" button on receiver for over 3 seconds until the connected light flashes, which means well deleted.

## PUSH DIM

hile connected with PUSH LV, click the button to switch ON/OFF lights. Press and hold down the button to increase/decrease light intensity.

## Product Dimension

Note: when mounting the driver, please choose any one of the three fixing screw holes to fix with a screw at each end
